TEARPROOF TAGS

This is a plastic (PE) laminate with paper on both sides.

The tag prints like card, but you cannot tear it. It is covered plastic and is very popular where strength is essential but water resistance is not.

The tags can be supplied in continuous form. They are also suitable for having slots put in and are easy to write on.

VINYL SELF-ADHESIVE LABELS

These vinyl self-adhesive labels are used inmany areas of the door industry on thebottom rail labels.ce labels,service labelsand keyswitch label to advertise customer`sdetails.

The vinyl self-adhesive labels come in avariety of colours in vinyl and polyestermaterial can be hot-foil and digitally printedin 1-4 colours to your specification.

TYVEK TAGS

Tyvek tags are easy to write on and can be supplied in continuous form or as single labels. Ideal for outdoor use, they are chemical, water and tear resistant.

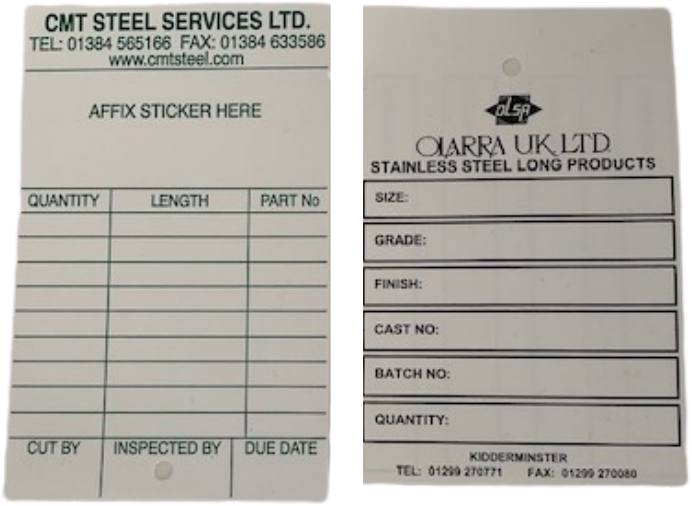
We can flood coat white Tyvek to six standard colours (red, yellow, blue, green, pink and orange). The standard weight of Tyvek is 75 gsm although we also supply 105 gsm for a small extra charge.

MANILLA TAGS

The paper manilla and pulp board tags tend to be used in industrial environments where simple print is required with stock control, examination and production.

We can print these tags in up to four colours but the majority of customers print this type of tag in one or two colours

PLASTIC TAG



Toughtag is a 200 micron non-tear plastic which is clay-coated to a give a very smooth matt finish which allows excellent print quality.

Easy to write on, it has very high burst strength so it often requires no reinforcement on the hole.We also stock a 350 micron Toughtag.

The material is suitable for die cutting or putting a slot in. It is water resistant and weather proof. Tags made from Toughtag can be left outside for months at a time. The base material is white and we can print 6 standard colours from stock - red, yellow, green, blue, orange and pink. Any other colour you require will be printed to order.
