DOMED SELF-ADHESIVE LABELS

Product and company branding is a key part of designing and successfully marketing a product. It is essential that your logo stands out from the rest.

Make sure you stand out with our 3D domed badges and domed labels! At Images labels we can either screen or digitally print your logo onto; plastic, aluminium or stainless steel creating a bright, bold and colourful design. This is then covered with a clear, high gloss polyurethane resin which provides the bubble domed badge effect creating a high quality prestige badge to promote your product.

With the ability to produce the domed badges with a suitable adhesive and material to ensure their durability for different applications, a domed label can be used in most industries.

ANODISED ALUMINIUM NAMEPLATES

These offer a durable finish whereby the text detail is sealed within the grain of the aluminium. The aluminium is electrically charged within a sulphuric acid solution which forces the surface to oxidise in a controlled manner and opens the pores.

Ink is then either silkscreen printed or digitally printed into the pores and the aluminium is then sealed to provide a hard wearing finish. The digital printing option makes the process suitable for low volume requirements as well as long run production requirements.

CE ANODISED ALUMINIUM NAMEPLATE

These offer a durable finish whereby the text detail is sealed within the grain of the aluminium. The aluminium is electrically charged within a sulphuric acid solution which forces the surface to oxidise in a controlled manner and opens the pores.

Ink is then either silkscreen printed or digitally printed into the pores and the aluminium is then sealed to provide a hard wearing finish.

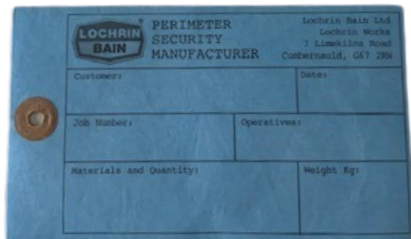

The digital printing option makes the process suitable for low volume requirements as well as long run production requirements.our requirements and, as many of our materials are held in stock, we provide a fast turnaround service.

TYVEK TAGS

Tyvek tags are easy to write on and can be supplied in continuous form or as single labels. Ideal for outdoor use, they are chemical, water and tear resistant.

We can flood coat white Tyvek to six standard colours (red, yellow, blue, green, pink and orange). The standard weight of Tyvek is 75 gsm although we also supply 105 gsm for a small extra charge.

STAINLESS STEEL NAMEPLATE

Stainless steel etched nameplates are a very durable option for harsh environments common in the where the nameplates need to withstand extreme climate applications.

The nameplates are produced by chemically etching the text detail from the surface of the material and this is then paint infilled to provide contrast for ease of reading.

We can also offer screen printed stainless steel nameplates on which the text detail is surface printed onto the stainless steel providing a more economical option.

EMBOSSED FENCING NAMEPLATES

These nameplates are made from aluminium and are embossed to your specification and can be produced in many shapes and sizes.

These are mainly used on wooden fence panels and gates

VINYL SELF-ADHESIVE LABELS

Vinyl can be supplied in a matt or gloss finish which allows excellent print quality.

It is easy to write on and durable as it is water resistant and weather proof. It can be supplied in numerous adhesives and colours

ALUMINIUM COMPOSITE BOARDS

White 3mm Aluminium composite boards these offer a durable finish whereby the text detail is sealed within the grain of the aluminium.

The aluminium is electrically charged within a sulphuric acid solution which forces the surface to oxidise in a controlled manner and opens the pores. Ink is then either silkscreen printed into the pores and the aluminium is then sealed to provide a hard wearing finish.

DIGITALLY PRINTED PLASTIC NAMEPLATES

These digital printed nameplates are used on the gates. The nameplates are moulded from rigid plastic. The badge size is available in 150mm x 40mm & 215 x 40mm has two fixing holes as standard with a raised outer rim.

These are available in white only and can be digitally printed with your company logo and information. We can help you design any of these nameplates to your own specification and conformity to help you mark your equipment correctly
