WHAT ARE UKCA MARK LABELS?

UKCA labels are the UK equivalent of European Union CE labels, used to show conformity to various national safety requirements and regulations. They're typically required for items such as electrical products, construction products and toys.

WHY ARE UKCA LABELS BEING INTRODUCED?

The 'CE' marking previously used on products is for use within the European Union. As such, the UK is transitioning to its own 'UKCA' system after leaving the EU. The mark was first published by the UK government in February 2019 as part of preparations for a 'no deal' Brexit. In September 2020 it was announced as the intended replacement for 'CE' marking.

If your new product needs a third party conformity assessment, this will be carried out by a UK 'notified body'. If you are self-declaring conformity, you will be able to use the UKCA marking.

Content published by Images Labels in relation to Brexit and The United Kingdom's departure from the European Union is a broad overview and should not be considered specific guidance for your organisation, or legal advice. We recommend conducting your own specific research into how changes in the law may impact your labelling requirements, both in the United Kingdom and European Union, and seeking independent guidance/legal advice.

CE DIGITALLY PRINTED PLASTIC NAMEPLATES

These digital printed nameplates are used on the bottom rail of the roller shutter.

The nameplates are moulded from rigid plastic. The badge size is available in 150mm x 40mm & 215 x40mm has two fixing holes as standard with a raised outer rim.

These are available in white only and can be digitally printed with your company logo and information. We can help you design any of these nameplates to your own specification and conformity to help you mark your equipment currently
